RE: Talbert Manufacturing / 073-16356-00025

FROM: Paul Dubenetzky
Chief, Permits Branch
Office of Air Quality

Notice of Decision: Section 112(j) Applicability Determination

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to IC 4-21.5-3-5(f) this order is effective fifteen (15) days after it is served. When served by U.S. mail, the order is effective eighteen (18) calendar days from the mailing of this notice pursuant to IC 4-21.5-3-2(e).

If you wish to challenge this decision, IC 4-21.5-3-7 requires that you file a petition for administrative review. This petition may include a request for a stay of effectiveness and must be submitted to the Office of Environmental Adjudication, 100 North Senate Avenue, Room 1049, Indianapolis, IN 46204, **within eighteen (18) calendar days of the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) the date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons with particularity, for the request;
- (5) the issues, with particularity, proposed for consideration at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

Rensselaer, IN 47978

Re: Response to Review Request No. 16356:
 Section 112(j) Applicability Determination
 Plant ID: 073-00025

Dear Mr. Odle:

Talbert Manufacturing, Inc., located at 1628 West State Road in Rensselaer, Indiana, submitted a request for an applicability determination regarding the requirements of Section 112(j) of the Clean Air Act (CAA) on May 16, 2002. The letter was submitted in accordance with 40 CFR 63.52(d)(1) and requested that the Indiana Department of Environmental Management, Office of Air Quality (IDEM, OAQ) determine if Talbert Manufacturing, Inc. is subject to the requirements of Section 112(j) (40 CFR 63.50 through 63.56) for the Miscellaneous Metal Parts & Products Surface Coating source category.

Pursuant to 40 CFR 63.50, the requirements of Section 112(j) will apply only if your entire source is a major source of hazardous air pollutants (HAPs) and one or more of your processes or emissions units belong in a category or subcategory for which the United States Environmental Protection Agency (U.S. EPA) has failed to promulgate an emission standard on or before the Section 112(j) deadline. IDEM, OAQ has determined that your source is not subject to Section 112(j) for the Miscellaneous Metal Parts & Products Surface Coating source category. An explanation of this determination is provided below.

MAJOR SOURCE DETERMINATION

The information submitted in the Part 1 MACT Application indicates that Talbert Manufacturing, Inc. is a major source of HAPs. In addition, the Title V permit for Talbert Manufacturing, Inc., T073-6926-00025, issued on December 31, 1998, indicates that the source is a major source of HAPs. A renewal application for this source was received on February 25, 2003 and given the following permit tracking number: T073-17566-00025. Since Talbert Manufacturing, Inc. is a major source of HAPs, IDEM, OAQ evaluated the source categories for which Talbert Manufacturing, Inc. requested an applicability determination.

SOURCE CATEGORY DETERMINATION

Miscellaneous Metal Parts & Products Surface Coating NESHAP

Since the final MACT standard for Miscellaneous Metal Parts & Products Surface Coating was promulgated on January 2, 2004, Talbert Manufacturing, Inc. is no longer subject to Section 112(j) for that source category; however, Talbert Manufacturing, Inc. may be subject to the promulgated MACT standard. Talbert Manufacturing, Inc. should check the applicability of the MACT standard. If the promulgated MACT is applicable, Talbert Manufacturing, Inc. shall comply with the promulgated MACT standard in accordance with the schedule provided in the MACT standard. The MACT requirements include the applicable General Provisions requirements of 40 CFR 63, Subpart A. Pursuant to 40 CFR 63.9(b), if Talbert Manufacturing, Inc. is subject to the MACT, Talbert Manufacturing, Inc. shall submit an initial notification not later than 120 days after the effective date of the MACT, unless the MACT specifies

otherwise. The MACT and the General Provisions of 40 CFR 63, Subpart A will become new applicable requirements, as defined by 326 IAC 2-7-1(6), that must be incorporated into the Part 70 permit. After IDEM, OAQ receives an initial notification, any of the following will occur:

- (A) Since a renewal application is in progress, IDEM, OAQ will include the MACT requirements pursuant to 326 IAC 2-7-9; or
- (B) The owner or operator of the affected source may submit an application for a significant permit modification under 326 IAC 2-7-12 to incorporate the MACT requirements. The application may include information regarding which portions of the MACT are applicable to the emission units at the source and which compliance options will be followed.

If the promulgated MACT is not applicable, no further action regarding the MACT will be necessary.

If U.S. EPA promulgates a final MACT standard prior to IDEM, OAQ issuing a permit containing the Section 112(j) determination requirements, a source is no longer subject to Section 112(j) for that source category, including the requirement to submit a Section 112(j) Part 2 MACT Application. A source is still subject to Section 112(j) for any other source categories that do not have promulgated MACT standards.

This determination is based on the information provided by Talbert Manufacturing, Inc., IDEM, OAQ records, and the information currently available from the U.S. EPA. Note that if additional equipment or capacity is added or operational practices are changed (e.g., switching solvents from a solvent that contains no HAPs to a solvent containing HAPs), the Section 112(j) requirements may be triggered in accordance with 40 CFR 63.52(b). If the events described in 40 CFR 63.52(b) occur at the source, Talbert Manufacturing, Inc. shall submit a Part 1 MACT Application in accordance with the requirements and schedule contained in 40 CFR 63.52(b).

Questions should be directed to Kim Cottrell, IDEM, OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (800) 451-6027, and ask for Kim Cottrell at extension 3-0870, or dial (317) 233-0870.

Sincerely,

Paul Dubenetzky, Chief

Re: Response to Review Request No. 16356:
 Section 112(j) Applicability Determination
 Plant ID: 073-00025

Dear Mr. Odle:

Talbert Manufacturing, Inc., located at 1628 West State Road in Rensselaer, Indiana, submitted a request for an applicability determination regarding the requirements of Section 112(j) of the Clean Air Act (CAA) on May 16, 2002. The letter was submitted in accordance with 40 CFR 63.52(d)(1) and requested that the Indiana Department of Environmental Management, Office of Air Quality (IDEM, OAQ) determine if Talbert Manufacturing, Inc. is subject to the requirements of Section 112(j) (40 CFR 63.50 through 63.56) for the Miscellaneous Metal Parts & Products Surface Coating source category.

Pursuant to 40 CFR 63.50, the requirements of Section 112(j) will apply only if your entire source is a major source of hazardous air pollutants (HAPs) and one or more of your processes or emissions units belong in a category or subcategory for which the United States Environmental Protection Agency (U.S. EPA) has failed to promulgate an emission standard on or before the Section 112(j) deadline. IDEM, OAQ has determined that your source is not subject to Section 112(j) for the Miscellaneous Metal Parts & Products Surface Coating source category. An explanation of this determination is provided below.

MAJOR SOURCE DETERMINATION

The information submitted in the Part 1 MACT Application indicates that Talbert Manufacturing, Inc. is a major source of HAPs. In addition, the Title V permit for Talbert Manufacturing, Inc., T073-6926-00025, issued on December 31, 1998, indicates that the source is a major source of HAPs. A renewal application for this source was received on February 25, 2003 and given the following permit tracking number: T073-17566-00025. Since Talbert Manufacturing, Inc. is a major source of HAPs, IDEM, OAQ evaluated the source categories for which Talbert Manufacturing, Inc. requested an applicability determination.

SOURCE CATEGORY DETERMINATION

Miscellaneous Metal Parts & Products Surface Coating NESHAP

Since the final MACT standard for Miscellaneous Metal Parts & Products Surface Coating was promulgated on January 2, 2004, Talbert Manufacturing, Inc. is no longer subject to Section 112(j) for that source category; however, Talbert Manufacturing, Inc. may be subject to the promulgated MACT standard. Talbert Manufacturing, Inc. should check the applicability of the MACT standard. If the promulgated MACT is applicable, Talbert Manufacturing, Inc. shall comply with the promulgated MACT standard in accordance with the schedule provided in the MACT standard. The MACT requirements include the applicable General Provisions requirements of 40 CFR 63, Subpart A. Pursuant to 40 CFR 63.9(b), if Talbert Manufacturing, Inc. is subject to the MACT, Talbert Manufacturing, Inc. shall submit an

initial notification not later than 120 days after the effective date of the MACT, unless the MACT specifies otherwise. The MACT and the General Provisions of 40 CFR 63, Subpart A will become new applicable requirements, as defined by 326 IAC 2-7-1(6), that must be incorporated into the Part 70 permit. After IDEM, OAQ receives an initial notification, any of the following will occur:

- (A) Since a renewal application is in progress, IDEM, OAQ will include the MACT requirements pursuant to 326 IAC 2-7-9; or
- (B) The owner or operator of the affected source may submit an application for a significant permit modification under 326 IAC 2-7-12 to incorporate the MACT requirements. The application may include information regarding which portions of the MACT are applicable to the emission units at the source and which compliance options will be followed.

If the promulgated MACT is not applicable, no further action regarding the MACT will be necessary.

If U.S. EPA promulgates a final MACT standard prior to IDEM, OAQ issuing a permit containing the Section 112(j) determination requirements, a source is no longer subject to Section 112(j) for that source category, including the requirement to submit a Section 112(j) Part 2 MACT Application. A source is still subject to Section 112(j) for any other source categories that do not have promulgated MACT standards.

This determination is based on the information provided by Talbert Manufacturing, Inc., IDEM, OAQ records, and the information currently available from the U.S. EPA. Note that if additional equipment or capacity is added or operational practices are changed (e.g., switching solvents from a solvent that contains no HAPs to a solvent containing HAPs), the Section 112(j) requirements may be triggered in accordance with 40 CFR 63.52(b). If the events described in 40 CFR 63.52(b) occur at the source, Talbert Manufacturing, Inc. shall submit a Part 1 MACT Application in accordance with the requirements and schedule contained in 40 CFR 63.52(b).

Questions should be directed to Kim Cottrell, IDEM, OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (800) 451-6027, and ask for Kim Cottrell at extension 3-0870, or dial (317) 233-0870.

Sincerely,

Original Signed by Paul Dubenetzky
